## Z-100 LIFELINE ARCHIVE SOFTWARE LIBRARY

This library is different from the "Z-100 LifeLine" Software Library.

The "Z-100 LifeLine" Software Library contains shareware or Public Domain software to share. While it may be copyrighted software, the author has granted permission to share this software freely, or at a very reasonable fee, sent not to the LifeLine, but generally to the author or company.

On the other hand, the "Z-100 LifeLine" Archive Software Library is not for sharing or even for sale.

As the editor of the last Z-100 specific publication, I feel an obligation to obtain and protect a copy of all Z-100 software, including documentation, for posterity and future Z-100 users or owners. Why?

The Z-100 and its software is now over 30 years old! Being magnetic media, these old software disks are beginning to degrade, with the loss of important data. And, of course, the software is no longer supported by the manufacturers, most of whom are no longer around anyway.

Nevertheless, the software is still protected by copyright laws... So, where does that place Z-100 Users?

Until now, your only option was to buy used software, that is, if you can find it at all. This Archive Library is a source library of software, not for sale, but to distribute (for the cost of shipping & library maintenance only - \$5.00 for a single 5-1/4" DSDD 360K floppy disk or 3-1/2" HD disk, plus an additional \$2.00 per disk after the first) to replace lost files. Obviously, the replacement disks will only be copies, not original distribution disks!

If you find an original manufacturer's disk is corrupt, e.g., a file is unreadable, just email me a photo of the bad disk, stating the problem, which disks need replacing, and what format is required - 5" or 3".

I will check my library for the needed files, and quote a price.

If acceptable, mail me another photo of the bad disk with a copy of my email and a check for the amount agreed upon. When I receive the check, I will make a new copy of what I have in the Library and mail it to you.

As this is Copyrighted software, there are some restrictions that must be followed:

- Send only a photo of the original manufacturer's disks. I must know you are a licensed user.

- I cannot, for obvious reasons, replace a corrupt .EXE or .COM file that may contain the licensing and/or registration information. And for everyone's protection, I can not copy and send someone else's licensed software to you. You would be better advertising in the LifeLine for a replacement, full copy. Someone is always interested in parting with their Z-100 and associated software.

- The cost would be limited to shipping and handling and I will supply any replacement disks. Checks must be in U.S. dollars and made payable to "Steve W. Vagts". Sorry, I cannot accept credit cards or PayPal.

- If the replacement disk is faulty (perhaps damaged in the mail), I will replace it again.

While the library is already fairly comprehensive, there is a lot of software still missing. If you wish to donate a program, just send me a working copy of each of the distribution disks, labeled with the program title, disk name (if any), version number, copyright information, and serial number.

In gratitude, I will replace any disks free of charge on a one for one basis.

Now, here are the files/programs I have and/or need:

#2700 SERIES:          DISK UTILITIES:
=====
#2701  Herman Utilities v1.03 (C)93 Paul F. Herman
      File management utilities

#2712A DiskPack v2.00       (C)89 William E. Flanagin
#2712B DiskPack v2.00       (C)90 William E. Flanagin
#2712C DiskPack v2.00       (C)90 William E. Flanagin
      Floppy disk device driver, distributed by Paul Herman
      Enables multiple floppy formats.

#2722  RamDrive v2.11      (C)84 Wong's Advanced Tech
      Uses existing computer memory

#2723  UCI RamDrive v3.20   (C)85 UCI Corporation.
      Uses UCI EasyRAM Board

#2730  Micro/Versal        (C)84 Advanced Software Tech
      Disk to Disk File Transfer Utility

#2741  LLSCSI/EEPROM v1.0  (C)92 Paul F. Herman
      Support files & utilities for LifeLine SCSI board.

#2783  Vopt v3.01          (C)90 Golden Bow Systems
      Hard drive optimizer utilities.

#2795  Unlock Album A+ v5.0 (C)86 Transec Systems, Inc.
      Unlocks copy protected disks

      Z-100 Font Program

#3500 SERIES:          DOS GAMES:
=====

```

I have not created this list as yet. Sorry.

**NOTE:** Beginning with the Library's #5000 series, the programs & applications listed are meant for running on the IBM PC or similar clones. Many will run on the native Z-100 under the ZPC system, with or without the hardware "Scottie Board", but most will require a hardware PC-emulator, such as the "Gemini" or "Easy-PC" systems. Most of applications HAVE NOT BEEN TESTED. But, of those tested, if they work on both the native Z-100 AND the PC-clone I use the note: "(For Z/PC-DOS; see #xxxx)". I hope you find this information useful.

S.W. Vagts, Editor.

```

#5000 SERIES:          Zenith PC-DOS Versions:
=====
#5002A PC-DOS v2.11       (C)83 Microsoft Corp.
      PC-DOS on 5" disks      Model #OS-63-62
      PC-DOS on 3" disks      Model #OS-63-61.
#5002X XVIEW86           (C)86 McGraw-Hill, Inc.
      Use with PC DEBUG v2.0 or v2.1

#5003A PC-DOS v3.10       (C)86 Microsoft & Zenith
      Model #OS-64-61 (2 disks)
#5003B PC-DOS v3.21       (C)87 Microsoft Corp.
      Model #OS-64-61 (3 disks)
#5003C PC-DOS v3.30 Plus  (C)87 Microsoft Corp.
      PC-DOS on 5" disks      Model #OS-64-61 (3 disks)
      PC-DOS on 3" disks      Model #OS-64-63

#5004  PC-DOS v4.01       (C)88 Microsoft Corp.
      Heavily modified by Mike Zinkow & John Beyers (9 disks)
#5006  PC-DOS v6.0        (C)93 Microsoft Corp.
      Heavily modified by Mike Zinkow & John Beyers, but no
      longer supported because ZDOS v4.3 was so much better!
      Tested under Gemini PC-emulator. This version was never
      released to the Z-100 community. (13 disks!)

|               | Disk Recovery, Testing, & Defrag Utilities                                                                                                                                                                                                     | (9 disks)                                                                            |
|               | This version modified to run w/ZROM v3.x & Z-DOS v4 w/ZPC                                                                                                                                                                                      |                                                                                      |
|               | <b>Note:</b> ZROM v3.x is no longer supported. It could not run other operating systems because of changes made in the ROM. These changes were corrected in ZROM v.4.3. However, these Norton Utilities have NOT BEEN TESTED with the new ROM. |                                                                                      |

**NOTES:**

- Software is normally on one or more 5-1/4" or 3.5" DSDD floppy disk(s), unless indicated otherwise. Most disk formats are supported.
- This is an extensive library and is offered as a service to Z-100 users.
- As such, the software has NOT BEEN TESTED. There are NO warranties nor guarantees that this software will work after you receive it, but I will replace disks again, in the event of postal damage.
- Finally, this Library is NOT for sale and is NOT available on CD-ROM.
- Thank you for your support.

If you have any questions or comments, please email me at:
