* * * * * **Z-100 SEPARATE KEYBOARDS** * * * * *

These keyboards require no permanent modifications to your present computer and are therefore completely reversible. The keyboard is connected to the computer via a flat ribbon cable about 30" long and goes from the motherboard connector directly to the modified keyboard. The cable is routed between the metal base and the lower plastic base. The case comes unfinished, but ready to paint. Since each keyboard is individually made upon receipt of the order, please allow about 4-6 weeks for delivery.

Z-100 SEPARATE KEYBOARD (assembled w/keyboard included)	\$ 120.00
